

# Biometric Screenings

*From the comfort of home*

A home test kit allows your employees to take part in biometric screenings from the comfort of their homes. A home test kit is complete mail-in lab test. Your employees will receive the kit, prick their finger, and then send it back to the lab for testing.

There are four simple steps to the home biometric screening:

1. Collect the sample via a finger prick
2. Mail the sample in a pre-stamped envelope
3. The sample is tested by the lab
4. Results are available online within a week

Our home test kits are sent and tested by CoreMedica Labs, who are CAP and CMS accredited- making them leaders in the field. Partnering with CoreMedica ensures accurate, easy, and convenient testing to participants.

The kit is mailed to employees directly from CoreMedica and employees mail back the sample back to them. This simple and seamless process eliminates the possibility for any errors and ensures a quick turnaround for the results.

For Go365 Members, the home test kit allows you to receive Go365 Points: up to 1,600 Go365 Points (adding cotinine and PSA awards additional points).

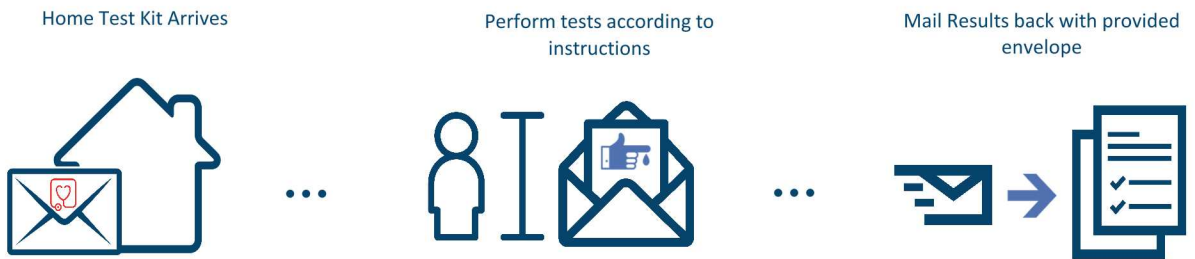

Because blood pressure cannot be taken at home, Go365 cannot award points for BP. If an employee can get their BP taken, they will get additional Go365 Points.

# Biometric Screenings

## Why Choose home test kits?

With the uncertainty of the current landscape, we know that hosting an onsite health screening event may not be possible for your team for the next month or so. It is still important for employees to be able to have a biometric screening completed. Every aspect of health is incredibly vital right now and since onsite screenings are paused for now, the home test kit is a great way of ensuring your employees can still have their biometric screening completed.

## How to Order

Email us at [info@solutionsforyourwellness.com](mailto:info@solutionsforyourwellness.com) and request a home test kit.

Please provide the following details:

- First and Last Name
- Date of Birth
- Gender
- Home address, city, and zip
- Email Address
- Humana Member ID + Group Number
- Test requested (lipid/glucose panel with/without additional tests)
